vffs bagging machine
super 240/50bpm/

These machines are reasonably quick, very reliable and extremely easy to use! These machines can also be fitted with additional functions such as gas flushing, label printing, gussets, vacuum packing and much more.

The **Super 240** machine is a workhorse, capable of packing at up to 50 bags per minute, consistently, accurately and reliably. A range of optional extras is available for the bagging machine to make it more suitable to your specification. These include gas flushing, euro slot hole punch, printers, cooling, laminate or polythene sealing jaws, vacuum packing and much more.

We have specifically designed the software on the **Super 240** machine to be user friendly, ergonomic and simple to use. With a few buttons and a simple "Start", "Stop" interface the machine can be operated easily and comfortably by even the most novice operator. Additional functions have also been added such as a bag counter that will automatically stop the machine after a target number of bags have been filled. This and a useful testing environment make the **Super 240** VFFS bagging machine a must have for anyone looking for a small scale or short term packing operation.

Summary/ Overall the Super 240 basic VFFS bagging machine is an affordable, reliable and quality packaging solution for small scale packing operations.
