multihead weigher
galaxy/14 head/

These machines are extremely accurate, fast, efficient and extremely reliable, they are also capable of working with a wide range of products and product types and they have been designed to be extremely simple to setup and operate. These machines will also suit a wide range of products.

The Galaxy 14 head multihead weigher is available as standard or with dimpled contact surfaces to help move damp products and will run reliably and accurately at up to 100 weighs per minute. Speeds are affected by target weight, infeed, product feeding, product type and viscosity.

Suitability/ Suitable for a wide range of products including damp and sticky products.

Accuracy/ Extremely high accuracy multihead weighing. *Accuracy is dependant on target weights, product type and quality of product.

Speed/ Up to 100* bags per minute. *Maximum speed is determined by target weight, product viscosity and quality of product.

Affordability/ Affordable for medium to long term weighing requirements.

Simplicity/ Very simple machines to use and run. Require no previous knowledge of machines or operation experience.

Reliability/ High quality, reliable machines will easily run for extended periods with no loss of quality or accuracy.

Labour/ Can be run by one person providing an automated feed system is used.

Suitable For/ Dry, damp, sticky products

Ideal For/ Medium to large weighing requirements

Technical Specification/

Weigh Range/ 10g-3kg

Max Speed/ 100wpm

No. Heads/ 14

Accuracy/ 0.5-1.5g

- Dry Products

vffs bagging machine
storm 300/100bpm/

These machines are very quick, very reliable and extremely easy to use! These machines can also be fitted with additional functions such as gas flushing, label printing, gussets, vacuum packing and much more.

The **Storm 300** machine is a workhorse, capable of packing at up to 100 bags per minute, consistently, accurately and reliably. There are a range of optional extras available for the bagging machine to make it more suitable to your specification. These include gas flushing, euro slot hole punch, printers, cooling, laminate or polythene sealing jaws, vacuum packing and much more.

We have specifically designed the software on the **Storm 300** machine to be user friendly, ergonomic and simple to use. With a few buttons and a simple "Start", "Stop" interface the machine can be operated easily and comfortably by even the most novice operator. Additional functions have also been added such as a bag counter that will automatically stop the machine after a target number of bags have been filled. This and a useful testing environment make the **Storm 300** VFFS bagging machine a must have for a small scale or short to longer term packing operation.

Summary/ Overall the Storm 300 premier VFFS bagging machine is a high speed, yet affordable, reliable, quality packaging machine for medium to large scale packing operations.

Ideal For/ Medium to large weighing requirements

Speed/ Up to 100* bags per minute. *Maximum speed is determined by target weight, bag size and film type.

Affordability/ Affordable for medium to long term packing operations where higher outputs / larger throughputs are required.

Simplicity/ Very simple machines to use and run. Require no previous knowledge of machines or operation experience.

Reliability/ High quality, reliable machines will easily run for extended periods with no loss of quality or accuracy.

Labour/ Can be run by one person providing an automated feed system is used.

Technical Specification/

Max Film Width/ 620mm

Bag Widths/ 110-300mm

Bag Lengths/ 100-380mm

- Servo Driven Film
- Servo Driven Seal Jaws
- PLC with Touch Screen HMI
- Eye-mark PEC Sensor
- Stainless Steel Construction
- Air Expelling System
- 12 Months Warranty

- Gusset Device
- Gas Flushing
- Euro-Slot Jaws
- Polythene Film Sealing System
- Vacuum Device
- Bag Support

multiplik packaging machinery
contact/information/

MultiPak Packaging Machinery source new packing machinery from around the globe to provide our customers best prices available for quality and reliable machinery.

We also offer a range of services including installation, commissioning, training, support and maintenance and we also together and install complete packing lines.

As a company we aim to provide our customers with options that can raise their productivity and increase profits, ultimately providing an opportunity for growth.

Our business is not only about sourcing quality products. We also provide a complete service from initial enquiry through final installation by the customer to support thereafter.

Company Ethos/ We pride ourselves on great customer services and to listen to our customers, anticipating what they require.

Our Aim/ To provide a complete service from initial enquiry through installation to support thereafter.

We thrive on being able to provide reliable, affordable machinery and support to businesses in order to establish and grow high.

The smart way to pack!

We manufacture and supply brand new packaging equipment and machinery.

We provide multihead weighers, vertical form fill seal bagging machines, bespoke packing systems and complete lines. We also provide support, spares and servicing.

All of our support, servicing and sales teams are UK based to ensure confidence, professionalism and speedy results.
