multihead weigher
nebula/10 head/

These machines are fast, efficient and extremely reliable, they are also capable of working with a large range of products and product types and they have been designed to be extremely simple to setup and operate! These machines will weigh a wide range of products.

The Nebula 10 head multihead weigher is available as standard or with dimpled contact surfaces to help move damp products and will run reliably and accurately at up to 60 weighs per minute. Speeds are affected by target weight, inconsistent feeding, product type and viscosity.

Suitability/ Suitable for a wide range of products including damp and sticky products.

Accuracy/ High accuracy multihead weighing. *Accuracy is dependant on target weights, product type and quality of product

Speed/ Up to 60* bags per minute. *Maximum speed is determined by target weight, product viscosity and quality of product

Affordability/ Affordable for short to long term weighing requirements including start up businesses and temporary contracts.

Simplicity/ Very simple machines to use and run. Require no previous knowledge of machines or operation experience.

Reliability/ High quality, reliable machines will easily run for extended periods with no loss of quality or accuracy.

Labour/ Can be run by one person providing an automated feed system is used.

Suitable For/ Dry, damp, sticky products

Ideal For/ Small to large weighing requirements

Technical Specification/

Weigh Range/ 10g-3kg

Max Speed/ 60wpm
