vffs bagging machine
lightning storm/180bpm/

These machines are extremely quick, very reliable and extremely easy to use! These machines can also be fitted with additional functions such as gas flushing, label printing, gussets, vacuum packing and much more.

The **Lightning Storm** machine is a twin high speed vertical form fill seal bagging machine, capable of packing at up to 180 bags per minute, consistently, accurately and reliably.

There are a range of optional extras available for the bagging machine to make it more suitable to your specification.

These include gas flushing, euro slot hole punch, printers, cooling, laminate or polythene sealing jaws, vacuum packing and much more.

This machine is effectively two bagging machines together but using a single user interface for simplicity and reduced user interface.

We have specifically designed the software on the **Lightning Storm** machine to be user friendly, ergonomic and simple to use.

With large buttons and a simple "Start", "Stop" interface the machine can be operated easily and comfortably by even the most inexperienced of users.

Additional functions have also been added such as a bag counter that will automatically stop the machine after a target number of bags have been filled.

Summary/ Overall the Lightning Storm twin VFFS bagging machine is an ultra high speed, yet affordable, reliable, quality packer for large scale packing operations.

Ideal For/ Large, high speed, high output packing operations.

Speed/ Up to 180* bags per minute. *Maximum speed is determined by target weight, bag size and film type.

Affordability/ Affordable for long term packing operations where high outputs / large throughputs are required.

Simplicity/ Very simple machines to use and run. Require no previous knowledge of machines or operation experience.

Reliability/ High quality, reliable machines will easily run for extended periods with no loss of quality or accuracy.

Labour/ Can be run by one person providing an automated feed system is used.

- Servo Driven Film
- Pneumatic Seal Jaws
- PLC with Touch Screen HMI
- Eye-mark PEC Sensor
- Stainless Steel Construction
- Air Expelling System
- 12 Months Warranty

- Gusset Device
- Gas Flushing
- Euro-Slot Jaws
- Polythene Film Sealing System
- Vacuum Device
- Bag Support

multipak packaging machinery
contact/information/

MultiPak Packaging Machinery source new packing machinery from around the globe to provide our customers best prices available for quality and reliable machinery.

We also offer a range of services including installation, commissioning, training, support and maintenance and we also together and install complete packing lines.

As a company we aim to provide our customers with options that can raise their productivity and increase profits, ultimately providing an opportunity for growth.

Our business is not only about sourcing quality products. We also provide a complete service from initial enquiry through final installation by the customer to support thereafter.

Company Ethos/ We pride ourselves on great customer services and to listen to our customers, anticipating what they require.

Our Aim/ To provide a complete service from initial enquiry through installation to support thereafter.

We thrive on being able to provide reliable, affordable machinery and support to businesses in order to establish and grow high.

The smart way to pack!
